

Dear FCC Board Membership Body,

I wish to file a complaint wherein if you, the FCC, does not stop Sinclair Broadcasting company from airing the documentary "Stolen Honor"...you will be setting a bad precedent by giving carte blanche to group broadcast monopolies to run roughshot in its abuse of the public that it serves when it airs tainted documentaries under the desquise of NEWS and not allowing equitable time for an adequate response from the party that it offends. Where is the watchdog oversight duty that was given the FCC to monitor such programming atrocities? Ever since the Congress foolishly gave commercial broadcasting the green light to be neglectful of giving the offended party equal time to address slander or erroneous and questionable information to be consumed by the broadcasting viewer and listener as fact, the American public has been the victim of this cesspool result. It is an outrage if you fail to address this issue...in light of allowing the tainting of a United States presidential outcome to be decided by unfair broadcast time that weasels questional information under the umbrella of news??? Thank you.

Manuel Barrera

p.s.: please confirm that you received this protest.
Thank you. m.b.
